# Gentry Restorations Parts Catalogue

Gentry Restorations Ltd is the official restorer for Bugatti Automobiles SAS Molsheim and one of the leading vintage Bugatti car restorers in the world. The experience gained by restoring these iconic cars has resulted in manufacturing and storing a wide range of parts. The company has over 4000 individual parts lines and over 1000 of them are manufactured in-house.

This catalogue shows the parts that are available. However, owing to the high value of many of them, some need to be manufactured to order. The parts that are immediately available are identified with **(Stock)**. All other parts will be subject to a build/lead-time. The build/lead-time will depend on the volume of work we are committed to and the complexity or rarity of the component required. Occasionally, the build/lead-time can be improved for a premium on the list price, but for all parts not shown as stock items, please contact us for specific details and timings. Finally, if you cannot find the part you need for your car(s), it doesn't necessarily mean it's not available. Please contact us and we'll confirm whether or not we can manufacture the item for you.

Collectively, our engineers and technicians have over 200 years of experience working with vintage Bugattis. All the necessary equipment, skills, knowledge and technology is available in-house. There is nothing the team cannot overcome when restoring these most treasured cars. We have access to original Bugatti factory drawings and our engineers have the ability to make almost anything - even if it's not for a Bugatti. The company's engineering skills are transferable. Our engineers just need a drawing, a picture, or even the old part that needs replacing, we'll almost certainly be able to manufacture it for you.

**Please note that some photographs in this catalogue are for identification purposes only and not necessarily fully representative of the completed component.**

## Refunds

Refunds can be given on any parts purchased, provided they're returned with the original invoice and in the same condition as they were sold. The company reserves the right to make a handling charge for returned items. The time limit for refunds is 12 months from the date of invoice. All return carriage charges must be borne by the customer.

Unfortunately, the company cannot extend this refund policy to bespoke, manufactured items.

## Payment for Purchases

Written estimates are always provided before transactions take place. Full payment is required before, or at the time of, dispatch. This can be done by bank transfer or credit/debit card (with the exception of American Express). All payments must be made in UK pounds sterling.

The parts department is open Monday to Friday 08:00hrs – 17.00hrs UK time

**Phone: + 44 (0) 1844 338346**
